

There's only ever been one
Original.

A Company built on Tradition...

It was in 1889 that The Original Pawleys Island Rope Hammock® was created in a quiet summer resort along the South Carolina low country coast. The Original tradition of quality craftsmanship that was born has now grown to become a true symbol of southern relaxation.

As the story goes, it was Joshua Ward, a river boat pilot, who first wove a knotless hanging bed in his search for a cool night's rest. His rope design replaced the hot and uncomfortable grass-filled mattresses that had hung aboard his boat. That design endures to this day.

In Joshua's quest for a better design lies the beginnings of a legacy of innovation that continues. While The Original Pawleys Island Rope Hammock® is crafted in the same style, using the same natural materials that were available to Captain Josh, today's innovations and weather resistant materials are being incorporated into special models.

A durable, weather-resistant rope has been designed to offer the same comfort that motivated Captain Josh but with the ability to provide long outdoor life. This revolutionary fiber is

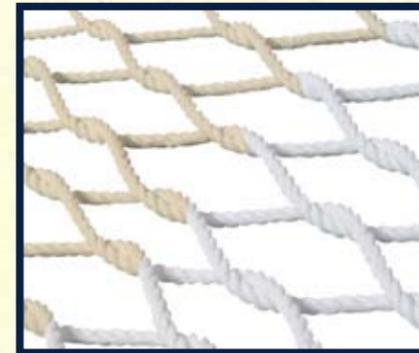

*Since 1889...
there's only ever been
ONE Original.*

trademarked DuraCord®. Rope hammocks as well as fabric hammocks are now crafted from DuraCord® to offer The Original Pawleys Island Rope Hammock® fans a selection of color and design that provides lasting enjoyment. We know Josh would approve.

“The Original.
The same innovative spirit that drove
Captain Josh to design his knotless bed
continues with the use of the latest in
weather-resistant materials.”

(Swing Sold Separately)

Our Rope . . .

Is of the highest quality, meeting and exceeding standards for quality, durability, and strength. The process begins with miles of yarns being formed into plies. Three plies are twisted and balanced to create our 3-ply rope.

- All 100% natural cotton yarns are used to craft our classic cotton rope hammocks.
Cotton, as a natural fiber, is soft and creates a comfortable hammock bed.
- 100% polyester rope is soft spun for comfort.
- All DuraCord® is created from weather resistant and color fast solution-dyed yarn with the added comfort of cotton.

Our Fabric . . .

Is solution-dyed DuraCord® for color fastness, stain and mildew resistance, and long outdoor life. The fabric is quilted using polyester fiber-fill batting. The very latest in color trends have been studied to create the collections that will expertly coordinate for any backyard setting.

DuraCord® is the answer to the quest for softness and long color life in rope and fabric.

- DuraCord® offers a UV protection package exceeding industry standards.
- DuraCord® is fast drying with only .01% moisture regain.
- DuraCord® is the most stain resistant fiber in the industry and can be cleaned with bleach.
- DuraCord® will not support any microbial growth. This product will not rot or sustain mold and mildew.
- DuraCord® has the soft hand of cotton, offering classic comfort with the added benefits of weather resistant performance.

Our Hanging Hardware . . .

On a hammock or swing, the greatest amount of stress is placed at the point of the hanging chains and rings. Our hanging hardware is the largest and heaviest steel in the industry. Our hardware is plated with zinc for long life in the outdoors. Every hammock also includes the hardware (tree hooks) needed for a tree installation.

Our Wood . . .

The wood components in our products are meant to take the weather of the outdoors.

- Oak is used in all spreader bars and furniture.
- Each component receives multiple hand-dipped coats of marine varnish to seal the wood from the elements.

Our Stands . . .

The heaviest weight steel in the industry is used for our hammock and swing stands. The Tri-Beam® hammock stand, our original design, easily assembles without the need for tools. Spring pins are used for maximum safety of assembly. In the crafting of the stand foot brackets, the signature safe Right Connection™ welding process is used, creating a strong 360 degree weld. A long lasting Cape Shield® powder coat finish is placed on all steel products.
