## THE HATTERAS DISTINCTION

The hallmark of a Hatteras Hammock is meticulously detailed workmanship. Each hammock's handcrafted design carries the mark of quality only true craftsmen can achieve.

Our commitment to innovation has earned three consecutive national design awards. Attention to detail is evident in our products. For example, our rope is manufactured in our North Carolina plant to high government specifications. To ensure user safety, we use the largest and heaviest chain in the industry for our one-piece ring and chain assembly. The Hatteras Tri-Beam hammock stands are made of heavy 12 gauge steel. In addition, an interlocking method of welding ensures the "RIGHT Connection" for maximum strength and safety.

At Hatteras Hammocks, our pride shows through in each product. Our reputation reflects a tradition of quality and a commitment to excellence.

### HEIGHT TO INSTALL TREE HOOKS (in inches)

Hammock Length*	Distance Between Trees/Posts					
	10 feet	11 feet	12 feet	13 feet	14 feet	15 feet
11 feet	66"	54"	48"	48"	48"	48"
12 feet	84"	72"	60"	48"	48"	48"
13 feet	96"	84"	72"	60"	48"	48"
14 feet	108"	96"	84"	72"	60"	48"

Heights in shaded areas not recommended and may give hammock such a pronounced arch as to be uncomfortable.

\* Distance measured from O-ring to O-ring when hammock laid flat on floor. Note that new hammock may be up to 2 feet shorter than its specifications, to allow for ropes' natural tendency to stretch the first few times hammock is used.

# ABOUT YOUR HATTERAS HAMMOCK®

Note: It is very important that you save these instructions for future use!

## OUR COMMITMENT

In 1971, we set out to deliver quality relaxation made in the United States of America. From selecting the finest raw materials to handcrafting our products right here in the Carolinas, we continue to carry out our passion for creating luxury relaxation products for the modern consumer.

## OUR ROPE

We handcrafted our ropes by unspooling miles of synthetic yarns into synthetic rope. Then, we precision-twist and balance three lengths of synthetic rope into a heavy-duty-three-ply synthetic rope construction. Our handcrafted synthetic ropes exceed US military exacting specifications for strength and are industry leading in quality, durability, and softness. Our solution-dyed Duracord® rope, the most colorfast rope on the market, is virtually nonabsorbent and resists fading, staining, rotting, and mildew.

## OUR FABRICS

We engineered our products to resist fading, staining, rotting, and mildew, combining the unmatched durability of all-weather and solution-dyed Duracord® or Sunbrella® fabric with nonabsorbent polyester fiberfill interiors and battings. Polyester fiberfill interiors provide thick layers of cushion to our most sought after products such as the pillowtop and tufted hammocks or single and double swings.

## OUR WOOD

Showcasing a naturally rich look, our cumaru, a hardwood also known as Brazilian Teak, is harvested from managed forests in South America and is known to be extremely durable and maintenance friendly.

## IDEAL LOCATION FOR HANGING HAMMOCKS:

Of course, the ideal location is on a covered porch, but most of us like to lie in the sun or under the shade of a tree. The second best place is a location that is dry and receives several hours of filtered light. We want you to enjoy your hammock for a long time, so we have included some awareness facts and guidelines for care and use as well as some important facts about the nature of the materials used in this product.

## INSTALLATION & USAGE:

\* Be sure the construction from which you are hanging your hammock is of good condition, sturdy, and large enough to securely and safely support the hammock and its maximum safe weight limit.

\* When installing the tree hooks that accompany your hammock, first drill a 1/8" pilot hole. Insert the screw hook to the point that the eye of the screw is in contact with the surface of the hole.

\* See back page for suggested hanging distances.

## NOTE: DO NOT OVER-TWIST THE HOOK ASSEMBLY.

This may cause damage to the metal and weaken the support.

\* If installing the hammock into any surface other than wood, consult a professional for the proper method and the additional supplies needed for a safe installation

\* We recommend, to prolong the life of your hammock, that your hammock be kept in a dry environment. If possible, do not leave your hammock outdoors overnight, completely dry when dampness occurs, avoid prolonged periods in complete shade, and protect from tree sap.

## INSECT AND ANIMAL DAMAGE:

\* Animals, such as squirrels, mice, dogs, and even birds, may disturb (or chew) the hammock as it hangs. Hanging a wind chime on or near the hammock may help as the noise will usually keep animals away.

## MAINTAINING YOUR HAMMOCK:

Proper care and cleaning of your hammock will help preserve and maintain its natural beauty, as well as ensure years of use.

\* A solution of mild soap and water will remove most dirt.

\* For stains: spot clean and rinse thoroughly.

## PRECAUTIONARY MEASURES BEFORE EACH USE:

\* Check for loose or untied ropes

- Where the ropes pass through the wooden spreader
- Around the metal ring at each end of the hammock
- Where the ropes intersect in the body/hammock bed

\* Weak ropes: Check the ropes by pulling on them. If ropes are weak, the hammock may be unsafe for future use.

\* Cracks or weak areas in the wood

\* Chains and Hooks

- Check for breaks (cracking) or badly worn chain links
- Make sure the hook is securely attached in its mounting surface and that this surface is still solid and strong enough for the job.

\* Keep hammock out of direct sunlight and rain whenever possible. These precautionary measures are especially important before hanging your hammock each season and before storing it away. Cared for properly, your Hatteras Hammock will give you years of enjoyment.

**WARRANTY & RETURNS** - All Hammock Source products are guaranteed to be free of defects in both workmanship and material for up to one year from the date of purchase. Prolonged exposure to weather conditions including snow, rain, and humidity are not covered under the warranty, nor is damage caused by negligence, normal wear, mildew, or improper care, including storage, maintenance, and assembly. If an item is found to be defective within one year of its purchase, it will be replaced without charge upon the return of the unit accompanied by a sales receipt. If you choose to return an item, you must contact our customer service department at 252-758-0641 to obtain a Return Authorization Number that will allow us to track your unit once it arrives at our warehouse.

Installation methods not included in these instructions are not recommended.

If not using one of our hammock stands, inspect hanging structure prior to assembly and before each use.

**WARNING: DO NOT LEAVE YOUNG CHILDREN UNATTENDED ON A HAMMOCK**
